

TERRAZZO CUTTERS

IT CUTS ALL KIND OF TILE WITHOUT NEEDING ELECTRICITY

Manual tool used to cut all kinds of terrazzo and concrete tiles, bricks, marble, refractory and natural stone.

It has an extendable lever and two metallic tables: one to support the tile and another to collect the cut piece, with scales graduated in centimeters that facilitate placing the tiles in the right position to cut it to the desired measure. These metallic tables are fixed by oscillating hinges that can be folded down and make the terrazzo cutter easily transportable thanks to the two laterally arranged folding handles.

CT 50

- It provides greater precision in cutting thanks to the hardened and ground blades.
- To cut anywhere without needing electricity.
- No anchorage needed.
- Easy transport.
- Less effort.
- Models up to 10 cm cutting height.

Instructions for use:

- Place the material to cut just in the centre of knives. If it has a polished face, place it towards the floor.
- To regulate the height of knives, turn the regulation nut up to a position of 30° angle between the operation lever and horizontal.
- Push 1 or 2 times the lever to press the material, and then proceed with the cutting operation.
- Clean and oil the guides of knives.

How to cut correctly

TECHNICAL FEATURES

		CT 40	CT 40/10	CT 50
