

MC 250

DESIGNED FOR INSTALLATION INSIDE TUBULAR SCAFFOLDING

The MC 250 model is compatible with all brands and types of scaffolding on the market. It can be equipped with different interchangeable carriers (standard carrier, easy access carrier with pivoting panels and system scaffold transport cage), depending on the type of loads to be lifted or the needs of the work to be completed.

Main features:

- **Load capacity:** 250 kg.
- **Standard carrier dimensions:** 900 x 500 x 900 mm.
- **Easy access carrier dimensions:** 1.300 x 800 x 1.100 mm.
- **System scaffold cage dimensions:** 900 x 500 x 1.800 mm.
- **Maximum speed:** 20 m/min.
- **Maximum height:** 70 m (ask us for greater heights).
- It climbs the "ladder" mast.
