

PROGRAMMABLE STIRRUP BENDERS

SIMPLE AND INTUITIVE PROGRAMMING

The DAE16-2S is designed for the manufacture of all kinds of stirrups. It is a machine of great performance and production: from 700 to 1000 stirrups per hour. We prepare these benders with a complete set of bushings and bolts, as well as a stop ruler for quality work.

- 3" colour touch screen.
- This bender works both with bar feeding from the left or from the right and anti clockwise.

DAE16 - 2S
